

EA Trade Reader

Install guide for MT5 (source platform)

Copy • Attach • Set path • Verify

Use this guide to install the ClickMimic Trade Reader EA in your source MT5. The EA writes trade actions to a signal file that ClickMimic reads.

1

Copy the EA into MT5

Place the EA file in MQL5\Experts.

2

Attach it to a chart

Enable Algo Trading and confirm it is running.

3

Set the signal file path

Match the path with ClickMimic and verify output.

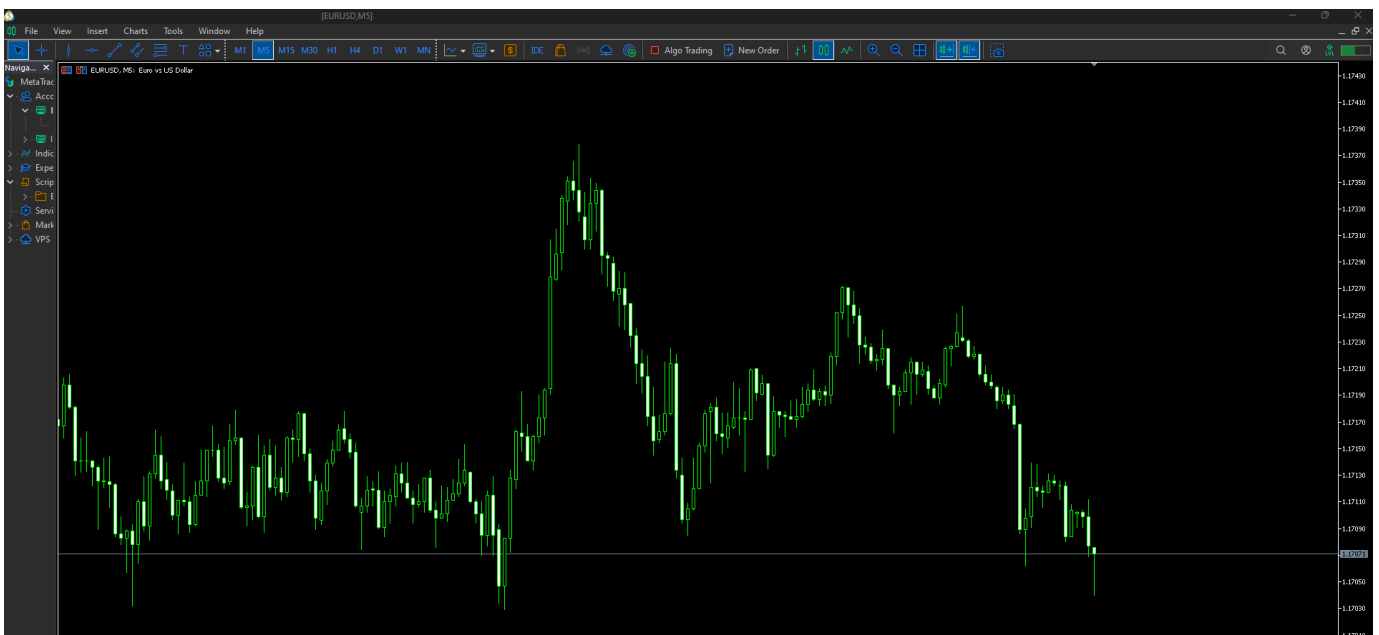

Need help?

Email support@clickmimic.com with a screenshot.
We will guide you step by step.

1) Turn on MT5, which will be used as the Trade Source.

Before you start (checklist)

- ☐ MT5 is installed and can be opened.
- ☐ You have the Trade Reader EA file (.ex5 or .mq5).
- ☐ You are using a demo account for the first test.

When to contact support

The signal file is not created or never updates.

You are not sure what path to use.

Send: screenshot of EA Inputs + screenshot of Pre-Flight + Diagnostics ZIP.

Tip

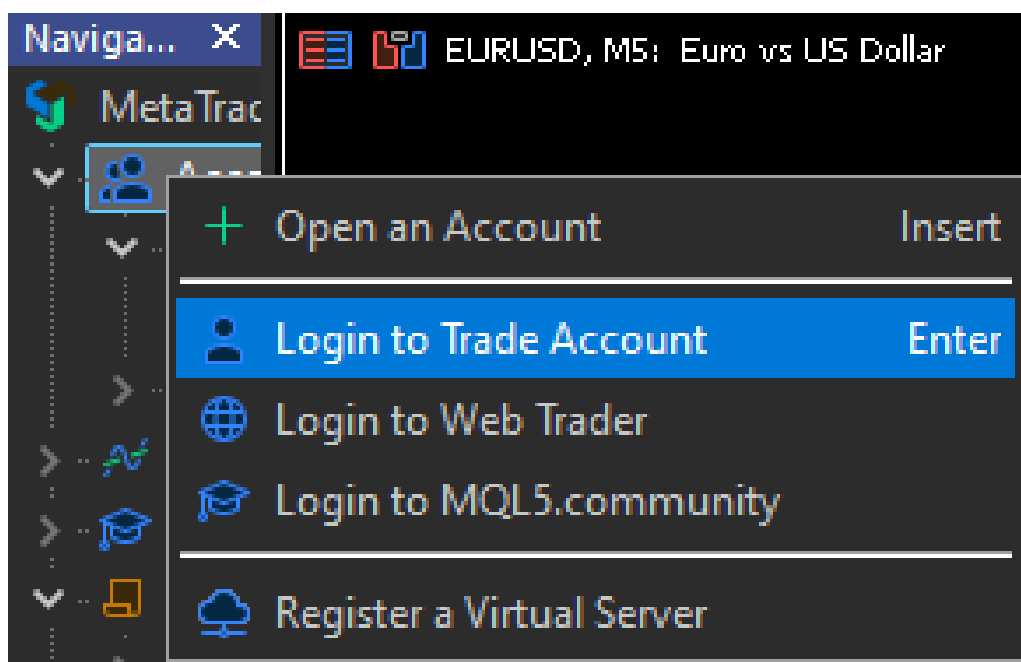

Do not rename the EA file after installing it.

Keep MT5 on the same PC and Windows user profile you use for ClickMimic.

If the EA does not run: open Tools -> Options -> Expert Advisors and enable trading.

Make sure MT5 and ClickMimic run with the same permissions (do not mix admin and non-admin).

2) Log in to your EA where Algo Trading is allowed. It can be Demo Account.

When to contact support

The signal file is not created or never updates.

You are not sure what path to use.

Send: screenshot of EA Inputs + screenshot of Pre-Flight + Diagnostics ZIP.

Tip

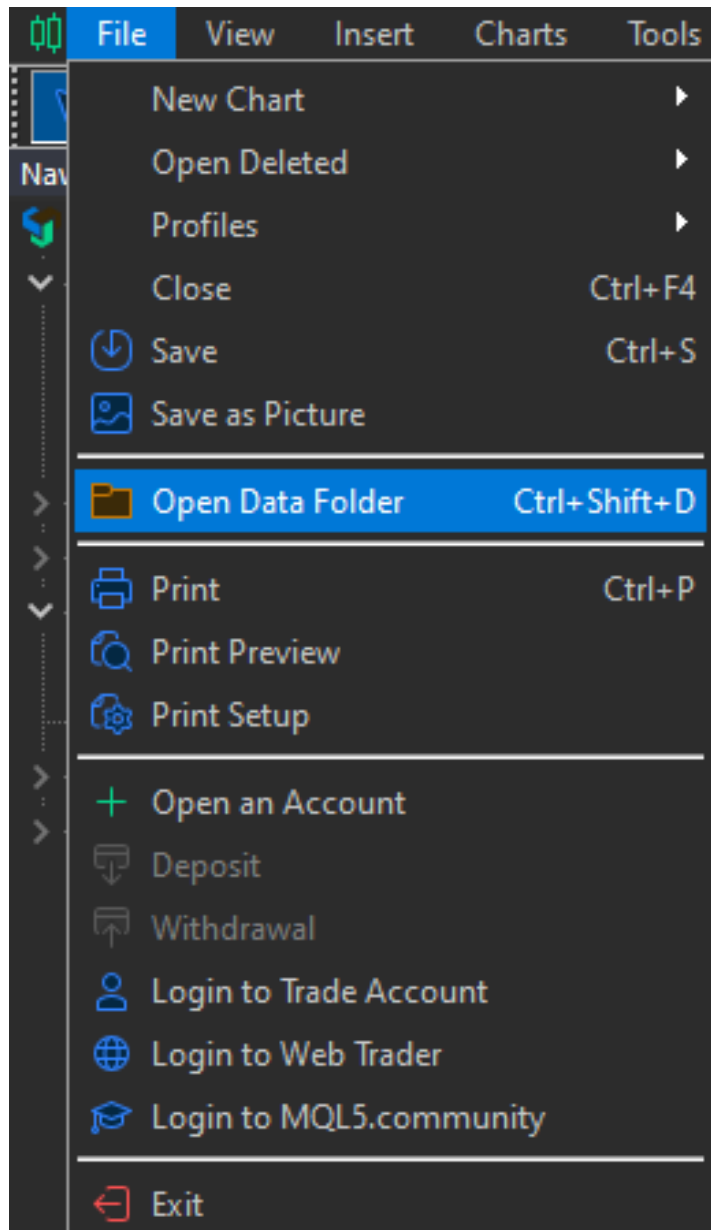

Do not rename the EA file after installing it.

Keep MT5 on the same PC and Windows user profile you use for ClickMimic.

If the EA does not run: open Tools -> Options -> Expert Advisors and enable trading.

Make sure MT5 and ClickMimic run with the same permissions (do not mix admin and non-admin).

3) Click File -> Open Data Folder

When to contact support

The signal file is not created or never updates.

You are not sure what path to use.

Send: screenshot of EA Inputs + screenshot of Pre-Flight + Diagnostics ZIP.

Tip

Do not rename the EA file after installing it.

Keep MT5 on the same PC and Windows user profile you use for ClickMimic.

If the EA does not run: open Tools -> Options -> Expert Advisors and enable trading.

Make sure MT5 and ClickMimic run with the same permissions (do not mix admin and non-admin).

4) Open „MQL5” Folder.
